

# LogoHome

## LogoHome

### *The Portable Multimedia Lab*

#### Overview

LogoHome is a free practice utility that is included with LogoLAB. LogoHome extends LogoLAB functionality outside of the school environment. Teachers or students working from home are able to:

- Import & Export audio and video documents
- Segment & Caption multimedia documents
- Run Audio Active Comparative recording activities

#### More Speaking Practice for Students

With LogoHome, students are able to practice recording themselves while running Audio Active Comparative recording activities on any computer. Students are able to listen to their responses and compare their responses with the native speaker.

#### Teachers Prepare Lessons at Home

Teachers can use LogoHome to segment audio-visual files for Audio Active Comparative exercises and/or add text captions to those files from any computer. This means that teachers need not stay at school to prepare LogoLAB lessons.
