

The Symposium family of language lab systems addresses the specialized needs of language teachers

Digital Language Lab Solutions

Powerful Capabilities

Symposium products start with crystal clear audio, and provide advanced options for student recording, pair-work, small group-work, and multimedia activities.

Modular extensible solution

Because teaching needs vary – and evolve over time, Symposium has been created as a family of modular products that are used individually, easily scaled, combined, and upgraded as needs change..

Symposium

LogoLAB

IntraLAB

Symposium LIVE

Flexible upgrade path

Schools can start with a simple relatively inexpensive solution – like Symposium LIVE or LogoLAB – and can then incrementally add more layers of functionality as needs grow and/or as budgets permit.

Symposium conforms to your teaching needs – and not vice versa!

Symposium

Symposium is a modern digital language lab system that supports teacher-led, computer-based student activities in a traditional lab setting for students of all ages.

Fully engage students

Grab student attention and interest with multimedia teaching materials. Have students respond interactively through speaking/recording and writing assignments.

Intensive target language exposure

Pairing and small group conferencing activities ensure that all students have maximum exposure to diverse listening and speaking opportunities.

Superb audio quality

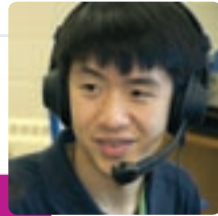

Students listen to crystal clear audio through comfortable padded headsets designed to isolate them from outside disturbances.

Simple & Intuitive

Teacher's graphical control panel is well organized and easy-to-use. Teachers can launch student activities and support students while they work individually, in pairs, or in groups.

Walk-In & Teach technology

Teachers are able to use any combination of modern digital media (CD-ROMs, DVDs, Internet) and traditional analog media (audiocassette tapes, VCR tapes).without modification or editing.

Symposium IntraLAB

IntraLAB is a modern digital language lab system that supports teacher-led, computer-based student activities in a traditional lab setting.

Powerful teaching tools

IntraLAB includes all of the teaching tools and capabilities associated with the Symposium system (described above).

Superb audio quality

Students listen to crystal clear audio through comfortable padded headsets designed to isolate them from outside disturbances.

Cost effective lab management

IntraLAB uses a cost-effective, high-performance digital screen sharing architecture that leverages a school's investment in computer and network systems.

Symposium LogoLAB

LogoLAB is a truly innovative digital language lab system that empowers both teachers and students to work interactively and independently in a computer-based, self-study, virtual lab setting

Anytime & anywhere participation

Users access LogoLAB at anytime from any school PC and from any location on the campus network.

Compelling multimedia activities

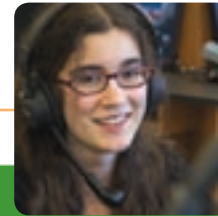

Instructors can assign reading/viewing, recording, and writing activities that employ audio, video, text, images, and captions to stimulate student participation.

Personalized student workspace

Each student has his own Student Space, to which instructors can post individual or group assignments.

Tracking student progress

Instructors are able to login when and where convenient to review student progress and responses to assignments.

Symposium LIVE

Symposium LIVE is a cost-effective digital language lab system suitable for teacher-led language learning activities in classrooms in which students may not have individual computers.

Superb audio quality

Students listen to crystal clear audio through comfortable padded headsets designed to isolate them from outside disturbances.

Intensive target language exposure

Pairing and small group conferencing activities ensure that all students have maximum exposure to diverse listening and speaking opportunities.

Compelling multimedia presentations

From a projector or large-screen TV connected to the teacher's PC, teachers are able to show movies, internet sites, or any other computer application.

Simple & Intuitive

Teacher's graphical control panel is well organized and easy-to-use. Teachers can launch student activities and support students while they work individually, in pairs, or in groups.
